^CDC tracks incidence, distribution, and possible control of diseases, other factors relating to health, and is able to provide their analysis of an outbreak's severity on a case by case basis.

*Details will come from Post reporting, Department Bureaus (Regional, MED, S/GAC etc.), media coverage, and a variety of IGO/NGO reports.

**Given the fluidity of health issues, it may be more appropriate to message a Health Alert rather than adjusting the Travel Advisory at the Level 1 or Level 2.

***The primary level of advice should be applicable to 50 percent of the area of the country.
